* Since inception returns for periods of less than one year are not annualized. Please note that there are limitations when viewing short-term performance results in Portfolios with less than one year of performance. This short-term performance may not be achieved over longer time periods.

(1) Average annual total return for a given period is the rate of return that, if compounded annually during such period, would have produced the same cumulative total return as actually achieved by the Portfolio over the entire period. (Cumulative total return reflects actual change in the value of an investment over a given period, which has not been annualized.) Average annual total return represents a constant rate of return over a given period and it is not the same as actual year-by-year results, which will fluctuate each year. Returns covering periods of less than one year represent cumulative total returns.

(2) Since the inception date of the Portfolio, the Bank Deposit Account has been at Fifth Third Bank. The Bank Deposit Account may change without prior notice.
